## Series 10 UNA-CLAD Panel

### DESCRIPTION

Aluminum or stainless steel skins laminated to aluminum or kraft paper honeycomb core material. System is mechanically attached with caulked joints and installed in a non-sequential pattern.

### FEATURES

- flatness
- superb deflection resistance
- very lightweight
- special reveals
- non-sequential installation
- irregular-shaped panels

### MATERIAL OPTIONS

- coil-coated aluminum skins (.40 or .063)
- post-painted aluminum skins (short run, custom colors) .063 to .125
- stainless steel skins (kraft paper only)
- panel thickness from 1/4 to 3 inches

### FINISH OPTIONS

- Kynar 500®/Hylar 5000® high performance fluorocarbon resinous coatings
- coil anodized
- batch anodized
- stainless steel with #4 brushed-satin and #8 mirror-polished finish
- fluoropolymer high gloss finish
- special coatings

### LIMITATIONS

- Maximum narrow dimension is 58 inches (for 1-inch panels)
